## BOARD OF TRADE.

### A Busy Evening.

A meeting of the above was held in the "Review" office on Monday evening, there being a good attendance. President Dulmage occupied the chair. The minutes having been read and adopted.

Two new members in the persons of Messrs. A. Waddell and A. M. Flint, were admitted.

A communication was received and read, from Taber Board of Trade with reference to the formation of a Southern Alberta Associated Board of Trade, and requesting the Bow Island Board to send a representative to the meeting to discuss the matter.

On motion of T. W. Dyer and P. Ludtke, President Dulmage was requested to attend.

A petition for a Local Improvement District was handed in by the committee formed to draft same, and it was now ordered to be circulated for signatures.

H. C. Wilson of Winnipeg wrote requesting information as to the opportunities in Bow Island for a baker and confectioner.

The Secretary was requested to furnish the information asked for.

Two letters were read from the C.P.R. with reference to the establishment of stock yards in Bow Island, an appropriation for which it was stated had already been made for the purpose.

With regard to the condition of the roads and cutless south, a communication was read from A. J. McLean, M.P.R., stating that he, together with Mr. Almsworth, would make a trip to Bow Island shortly and look into the matter.

A letter from Lethbridge Herald was read announcing its intention to shortly issue a special number, a page of which it offered the Bow Island Board of Trade for \$100.

On motion of J. W. Hurd, seconded by P. E. Ludtke, the secretary was asked to ascertain the receipt of one business man regarding the above offer.

A letter was also read from the Stratford Mill Building Co., inquiring as to the prospects of establishing a \$2,000 flour mill here, and inquiring the price of gas, etc.

The Secretary was requested to answer same.

A petition for a recreation ground received from the Village Council caused some comment and the words contained therein reading "for the purpose of a recreation ground or for the purpose of depositing garbage or other refuse" aroused some adverse criticism, and eventually it was ordered to be handed back for amendment to the Council on motion of Dr. Patterson and E. C. Ludtke.

A desultory conversation then took place regarding the prospects of getting gas in the town, but nothing definite resulted.

The consideration of the reciprocity treaty, however, resulted in a motion passed by Dr. Patterson and J. W. Hurd that the Board signify its approval of the treaty, and this having been carried, the Secretary was requested to forward same to the proper quarter. The meeting then adjourned.

## BAND CONCERT.

The great social event of the year in Bow Island is the concert given by the Citizens' Band, and the one to be held this year on Saint Patrick's Day (March 17th) will, we venture to say, be fully in keeping with its predecessors.

The members wish to attract more than the usual gathering this year, however, as more music is required, and hopes are entertained that sufficient funds will be raised this spring to defray the cost of band uniforms.

The members' ambition is a laudable one and should be viewed as such by every resident, and consequently given general support.

In connection with the concert there is also a supper, the combined price for which is 50c, a very moderate sum.

A dance will be held later, the music for which will be furnished by Trombley's orchestra, and for which gentlemen will be charged \$1.00 and the ladies free.

A despatch from Minnesota states that insect oil and paint manufacturers are sending a warning to farmers to place orders for seed with caution at once to assure supply at seedling time. Last year there was a shortage of 12,000,000 bushels in the crop due to the almost complete failure of the crop in North Dakota, and reduced yields in South Dakota and Minnesota which districts must supply this year's seed.

## BOW ISLAND IS BUSY.

### C.P.R. Yards Filled with Cars containing Material for Natural Gas Operations.

Over forty-five cars of material have arrived up-to-date for the gas boring operations. Wednesday morning cars arrived containing the necessary machinery, implements, etc., for No. 3 ramp included amongst which were whole size of pipe, tools of every description, as well as a large gang of men for the work. One whole outfit has been removed here from Bassano.

The effect upon the town is naturally a big one, and the storekeepers are jubilant, the officials connected with the operations having loyally supported the town with their orders for goods.

On Thursday two good sized buildings were erected upon the west side of town, one of which will be used as a temporary office and the other as a warehouse.

These are to serve their purpose until the warmer weather allows operations to be commenced upon permanent brick structures, progress upon which it is hoped, will be reported early in April.

### SURVEYORS ARRIVE TO LOCATE NEW DEPOT.

First to be Erected on the Crew.

On Thursday a number of C.P.R. surveyors arrived in Bow Island to commence work upon the new depot which is to be erected here.

This according to tenders advertised for by the C.P.R., is to be a No. 3, and will be completely modern in its equipment.

The location of the new buildings is largely a matter of conjecture, but it is said that they will be erected slightly west of the present building.

Bow Island, we may add, has the honor of being the first town on the C.P.R. to have a new depot. It is also believed that the final location of the railway officials are contemplating extensive track alterations is further borne out by the appearance of stakes set up in various parts of the yards by the surveyors on Thursday morning.

### 10 CARS OF SEED GRAIN ARRIVE.

There is going to be some cultivation done in this district this year, if the number of cars of seed grain standing upon the tracks is any criterion. Ten cars is going to help a whole lot.

These cars according to instructions issued by the Commissioner of Immigration, will be opened for the distribution of seed grain about March 15th. This grain is inspected, cleaned and shipped in sacks, so that there will be no necessity for any of the applicants to go to the expense of procuring sacks.

### I.O.O.F. ORGANIZE.

About a dozen brethren assembled in the "Review" office on Thursday evening to make arrangements to organize a lodge of the I.O.O.F. in Bow Island. Mr. A. F. Dulmage was elected chairman of the meeting and Mr. W. P. Cotton secretary pro tem.

The meeting was very enthusiastic regarding the prospects in Bow Island, and many of those present believed that when once started the membership would roll up quickly.

After some discussion, it was decided to fix the charter fee at \$15, \$5 of which is to be paid upon application, and the Secretary to write and procure application forms as quickly as possible. For the night of institution, it was decided to hire Linquist Hall, and also to ascertain the charge for meeting nights thereafter.

The next meeting in connection with the organization of this Lodge will be held in the "Review" office on Thursday next, March 16th.

If you would enjoy your self tonight, support the band on Friday night.

The town presents a very busy appearance these days. Homesteaders who have been away for the winter are returning in large numbers and going on their claims, residents who have been shut in by the wintry elements, are now being drawn out by the mild weather and are staid in town getting repairs, purchasing implements, and otherwise preparing for what they all are optimistic enough to believe—a good summer and good crops. Certainly indications never justified their belief more than at present.

## Business is Booming.

## The Bow Island Review

A Town and Country Journal Devoted to the interests of Bow Island and Surrounding Districts.

Published at Bow Island every Saturday Morning.  
Subscription Price \$1.50 Per Year in Advance.

W. P. Cotton Publisher and Prop.

### ADVERTISING RATES

Transient Advertising such as legal notices, tenders, readers, etc., 12 per line for first insertion. See each additional one. Commercial Advertising rates on application. Professional Cards occupying one inch \$3.00 per quarter. Commercial Advertising payable monthly all other in advance. Four insertions constitute a month except per yearly contract. To ensure insertion of advertisements and new ads, notification of same must be made to this office before 12 o'clock noon Wednesday of each week. Lost items of interest as news, accepted up to each Friday. This rule is not a hard and fast one, but we cannot guarantee insertion after that time. Marriages, birth, and death notices inserted free.

### NOTICE TO CORRESPONDENTS

We invite Correspondence on all matters of public interest, and especially country news, but reserve to ourselves the right to omit any part or all the copy submitted. The name and address of the correspondent must accompany all letters for insertion, though not necessarily for publication. Country correspondents are requested to have their copy reach the office by Tuesday noon of each week. Country letters arriving the latter part of the week are frequently crowded out, and by the next week some of the news has lost much of its value on account of its age.

### JOB WORK

THE REVIEW OFFICE is well supplied with all kinds of type, and is prepared to execute at the shortest notice any job work from the dainties of cards to full sheet posters.

The Alberta Railway and Irrigation Company has been absorbed by the C.P.R. Like Alexander the Great, the latter is now looking out for new worlds to conquer.

The Medicine Hat News states that General Manager Loper has made the statement that the Lucky Jim Smelting Co. will move its large plant from Nelson to Medicine Hat this Spring. The reason given for the transfer of the works is that the heat from natural gas lends itself much more readily to control than that generated in any other manner and an even temperature is one of the requisites to the successful manufacture of zinc. The Canadian Pacific Railway Company, it is understood, is largely responsible for securing the industry for Medicine Hat and in order to facilitate matters in getting operations under way immediately, will supply gas from the company's private well.

This announcement opens up a glorious train of thought for the boosters of Bow Island to follow. We are not only nearer the source whence comes the supplies for the smelter, but we have far and away the greater supply of natural gas. If the fact that natural gas has been found to be necessary in the manufacture of metals is correct, we with our wonderful supply should and undoubtedly will successfully claim our share of this big industry.

Bow Island a replica of Pittsburgh! Just let your fancy run riot for a few minutes and watch for the lovely views it will furnish you.

## Fertile Plains' Farmers Union

This union is composed of farmers who live in the region south of Bow Island. It was organized on Jan. 7, with eighteen members, and at date March 6, has a membership of forty-eight, a gain of thirty members in two months. We have been meeting regularly twice a month, and have found about to occupy our attention. Our meeting of March 4 was quite an enthusiastic one. We had an increase of membership by sixteen. We agreed to unite in purchasing farm machinery with which to treat our seed grains and potatoes. We are planning to make war on the aphids, and are looking up the strychnine preparation.

A committee was appointed to try to secure the cooperation of the people living along the route from Bow Island southwest, a distance of thirty miles, to secure if possible the establishment of a twice a week rural mail delivery and local post-

sixty miles!—sixty, sixty-one, sixty-two, sixty-three, sixty-four, sixty-five. Your father looks remarkably well, Mrs. Kafonzeum. He must be getting on in years." Mrs. K. "Oh yes—he's seventy-six."

"Seventy-six is he? Remarkable!—Seventy-six, seventy-seven, seventy-eight, seventy-nine, eighty, eighty-one. I once saw an old man like him playing cricket and he made ninety-six runs. Fancy at that age scoring ninety-six! Ninety-seven, ninety-eight, ninety-nine, one hundred. And there you are, Mrs. Kafonzeum, right to the dot!"

### Miscellaneous

#### Estray.

On the premises of W. C. Jones (s.w. 6-11-16), cow, red, about five years old, dehorned, halter on, no visible brand. Apply as above.

#### Lost.

Our Boston terrier bitch, answering to the name of Fanny. Any person finding same will please notify Dr. Patterson or R. E. A. Chip and receive reward.

#### \$25 Reward.

One Bay Horse, nine years old, stands about 16 hands high, weight about 1200 lbs., rather light in the legs, over on the knees a little, some white around the left hoof. The other is a black horse, nine years old, 15 hands high, weight 1200 lbs. shed on front feet, a little white on the nose and on one hind foot. \$25 reward will be given on recovery of above animals.—H. O. Gilroy, Banquet, Alta.

#### Wanted.

A young girl to assist at table.—Apply Cote's Hotel, Bow Island.

#### Strayed.

One Grey Mare, four years old, weight about 1000 lbs., branded on left hip. Any information as to its whereabouts will be liberally rewarded. Strayed from see, T. L. & J. B. D. M. Garrison, Bow Island, Alta.

#### Poultry for Sale.

I have at my place a few hundred Plymouth Rocks, cockerens, best in the land. Hawkin's strain, rock and hens, set price, Medicine Hat, prices \$2 to \$3 each. Now is the time to change. Do not miss it. Cost money. A few of these birds were first prize at New York show and sold at \$200 for single birds. Now is your time to get something for almost nothing—I have also one good blood six months old, \$200 lbs., price \$25.—L. Watery 224-11, Banquet, P.O., Alta.

#### Tenders.

The undersigned is prepared to accept Tenders for building, packing, harvesting and reeling 62 acres of land on sec. 16-11-16, Tenders to be in by March 13th. The lowest or any tender not necessarily accepted.—M. Simpson, Bow Island.

Government of the Province of Alberta  
NOTICE TO STEAM ENGINEERS.

NOTICE IS HEREBY GIVEN that an examination will be held by Nat. Marshall, a duly appointed Inspector of steam boilers for the Province of Alberta, at:  
Taber, March 22nd, Union Hotel.  
Grassy Lake, March 24th, Grassy Lake Hotel.  
Medicine Hat, March 27th, Commercial Hotel.

At nine o'clock a.m. for the purpose of giving engineers and apprentices an opportunity of qualifying for Certificates under the provisions of the Steam Boilers Act, 1906.

Application Forms may be obtained on application to the Department or to the above-named Inspector, and must be properly filled out, witnessed, and declared to be a Commissioner or Justice of the Peace, before an examination can be granted.

JOHN STOKES, Deputy Minister, Department of Public Works, Edmonton, Alta.

## MONEY?

MONEY!

We have an unlimited amount of Insurance Money to loan on

### FARM LANDS.

None too large. Terms of Five Years. Interest 4 and 8 per cent. Come in and let us talk it over.

No. 214 (weekend), arrives here at 2.50 a.m.

You'll find it here next week.

**T**HIS number of smart gowns that are required for the winter season by the women who takes any prominent position in the social world is this season more than ever discouraging to the woman herself, who, unless she be possessed of a positive mania for clothes, hates to spend so much time at her dressmaker's. But Fashion demands a variety of dress, and her demands must be complied with, and at this time of year, when it might have been thought

### Blue Velvet Costume

that the clothes question was virtually settled, as many orders are being given for the additional street gowns as though the season were not yet begun.

The velvet costume, so marked a feature of this winter's styles, continues to be worn for all occasions; the skirt short, the waist simple in design but with a glint of gold or silver in the trimmings; the jacket with a wide collar and long sleeves; a short jacket of long coat, either in fashionable and always handsome furs—these comprise the costume, which is spite of its being so expensive enough to wear every day, is so extravagant in its design that it is considered smartest, but having one black costume does not in any way obviate the necessity for other costumes of the same description, only that they may be in blue, green, tan, navy, white, red, yellow, each and all in velvet are effective. The colored velvets, as, a rule, made up much more elaborately trimmed with embroidery and braiding and with fur, but they are no smarter, let it well understood.

The satin costume was so exceedingly popular last summer that long before the winter there were many rumors heard that satin would not be fashionable at all this winter and, anyway, that it would be very expensive. However, the weather. The heavy wool back satin is, however, a material quite impossible excepting in cold weather and any number of black satin costumes are at the moment in vogue. What is the explanation? The answer is the smartest people. For as a trimming is by far the best, but just as in the summer styles, the plain, untrimmed coat and skirt style finds many admirers, who contend that the trimmings are not worth the extra cost. The answer is that there were without this later it is complete. These factors of economy always seen a trifle lessened with such a positive gown, but sport and the economical standpoint.

Black is really quite as attractive a material for many reasons as the different colors and textures this season are extremely beautiful. The satin finish and, better still, the so-called silk finish, are marvellously soft and effective, and the material can be depended upon to make up well, to be draped or fitted to perfection. It is this winter combined with velvet and fur, the best-looking combination under any circumstances is smart. Black is the one exception, for while there are many charming black gowns and costumes, the light colors have the preference. A good combination is voile de soie, cloth and fur, and this permits of the most fascinating coloring, with a lining that can be either plain or figured. Black is the one color that is being worn in the most effective manner, the lining most effectively.

Just a touch of white or bright color as facing or edge work wonders in a gown that is too sombre in hue. Especially needs this to relieve it and make it beaming. Clearer way of accomplishing this result is the trimming with bands or folds of velvet of a dark color or black with just an edge of the color or white, then an edge again of the same or other color of the coat. The objection

sometimes made to this style is that it looks rather patchy and is ineffective, and there is a certain amount of reason in the criticism. If so desired the edge can be omitted from any bands or folds on the skirt, but on the waist and coat they are invariably effective.

[illegible]

cloth and velvet gowns worn with fur jackets are smart this season. This does not mean the elaborate gown worn under the long loose coat, but the gown that looks well with the short fur jacket. The broadtail or baby lamb jacket is very smart, fanciful in design and trimmed quite elaborately with braid and buttons. There need not be any fur on the skirt; at the same time a hint of it looks well but the gown is supposed to be complete in itself, and the fur jacket is merely the outer garment or wrap worn with it. So soft

and beautiful are the markings of the fur that it lo-  
like a piece of moiré. Over velvet it is shimmering and rat-  
richer in appearance than with the cloth, but a smart bit  
cloth gown is always a desirable addition to the wardrobe  
The striped velvets that are fashionable this winter are  
not as yet become too popular, as it was feared they mi-  
and inere are a number of very smart costumes made  
the hair line of which is extremely close, and there are some pat-  
where the line is a white or black and the same color as the  
of the material, not in the satin, which makes a contrast,  
drammatically effective one.

[illegible]

was with a mind as sceptical as this at Professor W. F. Barrett undertook, nearly twenty years ago, to investigate the two lengthy reports on the subject, one in 1895 and the other in 1900, whilst few new notes arise from a perusal of article of his in the December issue of the *Journal*. The *Journal* is a magazine devoted to the investigation of super-normal phenomena and the study of psychological problems. In the course of his excellent paper he gives a very complete history of the surviving cases of the number of the following striking cases of the dowser's successes which he has carefully investigated. With the former I have not space to deal in this article, but some of the latter are

concerns the search of Meerchardson and Co., the proprietors of the large factory in Ireland, for the cause of the disease. Acting on expert geological advice, their attempts were made to obtain the water from the surface, but with a complete failure, and on the whole resulted in a loss to the firm of considerable value over \$6,500. An English dowsing rod was then procured, and relied on. Slightly he traversed the ground, holding his dowsing-rod in his right hand, and suddenly he stopped so violently that it broke in his hands. Here the dower declared water was found, and surface was broken below the surface, and the boring which followed an excellent supply of water was found at a depth of rather less than 100 feet. The quantity of water that the bore-hole was enlarged, and from that time (1890) to the present has been a constant and a growing supply of excellent water, from 5,000 to 7,000 gallons an hour, has been obtained from this bore-

[illegible]

The student of the whole matter, says Professor Barlett, "is (1) the person who really poses the entire faculty are rare, though preclude exist; (2) the good dower is a sense of nature not (3) the involuntary nature of the forced twin which comes with the dower, due to a mutation in the sperm that can be excited in different ways; (4) the explanation of the success of good dowers, after prolonged and crucial tests, is—like that of another obscure human faculty or instinct—a matter for further physiological or psychological research," though he suggests the working hypothesis of unconscious extremely interesting one, and studies of clairvoyance. The subject is a psychology should be indebted to Professor Barlett for the light he throws on the subject.

"Metallizing" is ever on the lookout for some quaint novelty capable of fulfilling the purpose of personal adornment, and how the feminine world of western America has certainly availed itself of this opportunity is disclosed in this particular field. By means of a secret process, the discovery of Professor Louis Delamothé, a prominent electro-metallurgist, fruit, flowers, insects—indeed, all plant and animal life can be converted into metal. The process is called "electro-metallizing." "Metallizing" it is called and its application appears to be limitless. The "for instance, the rose no more" is a beautiful and beautifully tinted it may be, is taken from the garden, and with the aid of the process, the delicate stalk is transformed into solid metal about twice as tough as copper. It is not a plating process, but an actual metamorphosis from the organic into

**Organic edition:** The process is entirely ecological, and so skillfully and completely are the natural characteristics of the articles under consideration preserved that it is not until they are taken in the hand that their metallic nature becomes obvious. The pieces are made from 925-silver, with even the tiniest inlay, every hair-like fracture and every crease, and they are stored and imperishably preserved. Leaves, flowers, and even the most delicate of plants, flowers and so forth have been made in the most delicate and attractive pin, brooch, buckle, or whatever. One of the most fashionable of the pieces is a brooch in the shape of a "clever" hat-pin—a fowl's foot completely changed into metal—which forms one of the most beautiful pieces of jewelry. A lady's headgear that has yet been designed. The process is also utilized for the production of jewelry for the dining-room and dining-table, the thoroughness with which the interior is covered with the metal is so perfect that it is an excellent pepper box or sugar bowl. The perfection of the process has taken the place of the old-fashioned silver and it was only a few months ago that the success was at last achieved. The metal is made in the form of a full

MANY grumbles have appeared in the newspapers and elsewhere to the delectation of British tourists. Mr. T. S. Arthur, in the *Illustrated "Blackwood"*, a paper on "Continent," in which he draws a sharp contrast between the "old" and "new" as described by Dickens and the urban public-house, which will not "allow itself to be transformed into a mental 'restauranteau'." A motorist's experience in the French Alps, where French names in Highland dress, French names in Highland dress, French names in Highland dress, Highlands, there should be more dishes which recall the really excellent food of the "Times," compare French English ones much to the disadvantage of the latter.

In France the total cost worked up to £200 a day, exclusive of the £100 for the car, leaving £100 for the cost of the car was from three to four times the cost of the car.

The motorist the English charges likely to prove almost double the cost of the car, which is described in "Mugby Junction" as a thing of the past; for this reason the steamboat landed him in England at six forty-five p.m., with no provision for the night, and in a train without a breakfast, a

**Zam-Buk Will Give You Ease**

Have you a bad attack of "general aching"? You know the feeling. Limbs ache, muscles seem to have become tired out, your back aches, now and again a twinge of rheumatism strikes you here and there. Your chest feels tight, there is a pain between your shoulders, and altogether you need toning up.

Cold is responsible for this condition and a vigorous application of Zam-Buk will put you right. Take a hot bath, if possible, and then rub your chest and the aching limbs well with Zam-Buk.

Mrs. G. G. G. 707 Berkeley St., Toronto, writes: "I cannot speak too highly of Zam-Buk. I was suffering from a bad cold, which had settled in my throat, chest and sinuses. I tried all kinds of remedies but nothing seemed to help. I continued until I used Zam-Buk. On applying this to my throat and chest I found relief. I continued to use it until the cold and soreness I determined to use only Zam-Buk. I also rubbed it on my limbs when I felt the rheumatic pains. I was free from an on-again-off-again cold by applying Zam-Buk. I was free from the cold in throat and chest, and also the rheumatic pains in my limbs."

Zam-Buk will also be found a sure cure for cold sores, chapped hands, frost bite, ulcers, blood-poison, varicella, measles, chicken pox, and other inflamed aches, babies' eruptions and chapped places, cuts, burns, bruises and insect bites. It is a general household and store-kept remedy for all ailments. Obtain Zam-Buk Co., Toronto, upon receipt of price. Avoid harmful imitations.

Carrier-pigeons have been used to carry messages when no other means sufficed, and during the siege of Paris, when three hundred and sixty-three birds were sent out from the doomed city, one of the birds performed the almost incredible feat of carrying to the outside world, on one trip, less than 40,000 messages, averaging twenty words each. This was 800,000 words, or the equivalent of five or six average novels.

This marvel was accomplished

means of microscopic photography. The messages being first printed with ordinary type, and then photographed and microphotographed, until they had been reduced several hundred diameters. The final photographs were taken on slides or pellicles of collodion, each of which about two inches square, contained about two words. A dozen of these films, rolled up in a quill, weighed but twenty-eighths of an ounce. The messages could, of course, be read with a microscope, without the necessity of

Under favorable conditions, and comparatively short distances, pigeons have carried as much as three-quarters of an ounce. Using the photo-reduction method, it would therefore be possible for a single bird to carry messages in words to no fewer than one hundred and twenty ordinary volumes.

## REGINA IS HERE

"REGINA" is a handsome watch, of the finest construction, that is to be the prize in a special guessing contest that should command the attention of everyone. In order to emphasize the fact that Regina watches are superior in every way we have selected a 17 jeweled movement in a gold-filled case, which will be given away under the following conditions:-

On TUESDAY, MARCH 28th, we will wind this watch and place it in the show window. The first person guessing nearest to the number of hours, minutes and seconds the watch will run will be given the watch. Guesses received from MONDAY, MARCH 13th to 10 a.m. TUESDAY, MARCH 28th.

The contest is absolutely free and has no string to it in any way. This idea is to impress on your mind the fact that we handle the Regina watch and that it is a good watch. All guesses must be registered in person. No one under 18 years of age will be allowed to compete. Should the contest be won by a lady a six size watch will be substituted for the man's size.

ing was ably filled by J. H. Agar. The attendance numbered about about 100. The party of whom came from Bow Island.

Some 2000 was created in town the early part of the week by the report that engineers had arrived here and were taking soundings at the river, change was at once being training ideas as to their intentions, and finally the notion predominated that they were coming to build a canal in constructing a bridge over the river, on some railway. Upon careful inquiry, however, we learned the fact that they were government engineers engaged upon the hydrographical survey, and were taking soundings and measurements with a view to finding out the volume of water. This, we understand, is done periodically in order to determine what effect the water taken out by irrigation companies and others has upon the general flow.

arrive the 17th, and all the old mads are wishing for a car load of the opposite sex.

Quite a few from here attended the dance at Murray's ranch last Friday evening. There were about sixty present and a good time was enjoyed by all.

The Windy Ridge Orchestra held a rehearsal at the home of Ed. Ream Monday evening.
